At any given point in time if the MTM level of the client breaches 70% of his available Cash margin, the risk team would square off the complete positions of the client with or without intimating the clients.

For sake of better understanding, the square off percentage of 70% is basically the threshold base limit and it should not be construed as exact 70% for square off. The

position may get squared off at exact 70% above the base threshold limit. Due to market extreme volatility it may not be possible to monitor the square off limit from percentage (%) to percentage (%).

Further the above squareoff will also be based on the extreme volatility in the market which may have severe impact on the client and the company. The Company may or may not inform the client on the same in case of potential fluctuation. This would occur at the discretion of the Risk team. It would be client responsibility to ensure that sufficient margin is available at all the times.

- c) Margin Square-OFF Positions which do not have sufficient funds can be squared off any time at the discretion of our Risk team. There may or may not be a margin call or intimation from our Risk team. Positions would be squared off proportionally by the risk team to bring down your margin shortfall.
- d) Positions taken under Big Trade Products will be squared off immediately if the price gets triggered. Square off can also be initiated by client before 3.15 PM. Else RAMESHWARAM CAPITAL MARKET shall endeavor to square off the position at any time after 3.15 p.m.

In case the said position is not squared off before closure of the market, the position shall be carried forward to the next day. In such cases the client shall be responsible for ensuring that adequate margins are available in the client's account with RAMESHWARAM CAPITAL MARKET in order to ensure that there is not a shortfall in the account. In case there is a margin shortfall, the positions may be squared off based on the risk management policy of RAMESHWARAM CAPITAL MARKET.
